

# OpenDNS

**If your ISP is having issues with its DNS service, switching to OpenDNS' DNS will get you back online in just a few quick steps. Follow the instructions for your operating system or router below.**

If you have friends, family, or colleagues who have the same ISP as you, send them this info to help them get back online. Text them or call them with the IP address <http://208.69.38.205>.

Or, tell your Twitter followers that they can get back online by following the instructions on <http://208.69.38.205>.

**Questions?** Tweet @OpenDNS for assistance getting set up.
